

X-FAB Product Declaration

In line with the Environmental, Health and Safety Policy of X-FAB, we are working continuously on the reduction of environmental impact via legal compliances.

It is X-FAB's policy, that all purchased materials shall satisfy current government and safety constraints on restricted, toxic and hazardous materials; as well as environmental, electrical and electromagnetic considerations applicable to the country of manufacture and sale.

Restriction of Hazardous Substances (RoHS)

X-FAB hereby confirms that all its products supplied to its customers and/or its subsidiaries do not contain "intentionally introduced" lead, cadmium, mercury, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE) as defined in the Restrictions on Hazardous Substances (RoHS) EU Directives 2002/95/EC unless exempted by regulation.

X-FAB further warrants that any unintentional contaminant concentrations of these substances are :

- a. Below 0.1% for lead, mercury, hexavalent chromium, polybrominated biphenyls (PBB) and polybrominated diphenyl ethers (PBDE) for each homogenous material
- b. Impurities of cadmium are less than 0.01% for each homogenous material

X-FAB is also in compliant with the new RoHS Directive 2011/65/EU.

Registration, Evaluation, Authorisation and restriction of Chemicals (REACH)

All products produced by X-FAB are classified as Articles and therefore will not need registration under REACH.

X-FAB hereby confirms that all its products supplied to its customers and/or its subsidiaries, do not contain any of the 73 substances in the Candidate List of Substances of Very High Concern (SVHC) as per announced by ECHA on 19 December 2011.

X-FAB also confirms that its products do not contain any of the substances mentioned in Annex XVII of REACH regulation.

Halogen Free (Bromine & Chlorine)

X-FAB hereby confirms that all its products supplied to its customers and/or its subsidiaries, does not contain any halogen (bromine and chlorine) as defined under IEC 61249-2-21.

Sourcing materials from Conflict Regions

X-FAB is aware of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Wall Street Reform Act) requirements regarding the sourcing of metals (tin, tantalum, tungsten, gold) from conflict regions. At this point of time, to the best of X-FAB's knowledge, X-FAB products do not use materials that are sourced from mines in conflict regions in the eastern region of the Democratic Republic of Congo ("Conflict Regions"). As the reporting requirements are yet-to-be-defined, X-FAB will continue to work with our suppliers on this matter.

About X-FAB

X-FAB is the leading analog/mixed-signal foundry group manufacturing silicon wafers for analog-digital integrated circuits (mixed-signal ICs). X-FAB maintains wafer production facilities in Erfurt and Dresden (Germany), Lubbock, Texas (USA) and Kuching, Sarawak (Malaysia), and employs approximately 2,400 people worldwide. Wafers are manufactured based on advanced modular CMOS and BiCMOS processes with technologies ranging from 1.0 to 0.18 micrometers, for applications primarily in the automotive, communications, consumer and industrial sectors. For more information, please visit www.xfab.com.
